

Sprint 1 Report

SlugPlan, 2/3/16

Actions To Stop Doing

- There are a lot of delays in getting the development environment and base project set up.
- Procrastinating

Actions To Start Doing

- Create more users stories.
- Assign more user stories.
- Follow scrum meeting guidelines more closely. We don't really know what everyone else is doing all the time.
- Schedule more times to meet up and work on the project. Right now things are going pretty slowly.

Actions To Keep Doing

- Tri-weekly scrum meetings.
- Helping each other get stuff working.

Work Complete/Not Complete

Completed

- As a developer, I want a primary resource to scrape course data from

Not Completed

- As a developer, I want a stable database schema
- As a developer, I want access to a database with UCSC course information
- As a developer I want a working base framework for the UI/UX.
- As a student, I want to be able to search a class
- As a student, I want to be able to see a filterable list of classes
- As a student, I want to be able to have access to up-to-date information regarding classes
- As a student, I want to be able to see a class' pre-requisites
- As a student, I want to be able to look up classes that satisfy a major's requirements
- As a student, I want to be able to look up classes within a department

Work Completion Rate

We didn't assign story points to any of the user stories, but clearly our completion rate was very low.

Summary

Basically, we spent a lot of time this sprint procrastinating because we didn't really see a clear way forward. In future sprints, we need to meet up early on, plan out and assign detailed user stories, and give everyone a very concrete idea of everything they have to work on. In this sprint, no one had a clear direction to focus their efforts in, so not much progress was made.
