Sprint 3 Report
SlugPlan, 3/04/16

Actions To Stop Doing
- Everyone was on top of things and working together, nothing to really stop doing

Actions To Start Doing
- Last sprint everything seems to be okay now

Actions To Keep Doing
- Tri-weekly scrum meetings.
- Helping each other get stuff working.
- Researching ways to fix problems instead of blindly testing out different methods
- Keeping in contact with each other and keep everyone up to date on things that need to be done

Work Complete/Not Complete

Completed
- As a developer, I want a primary resource to scrape course data from
- As a developer, I want a stable database schema
- As a developer I want a working base framework for the UI/UX.
- As a student, I want to be able to search a class
- As a student, I want to be able to see a filterable list of classes
- As a student, I want to be able to see a class' pre-requisites
- As a student, I want to be able to look up classes that satisfy a major's requirements
- As a student, I want to be able to look up classes within a department

Not Completed
- As a student, I want to be able to have access to up-to-date information regarding classes
- As a developer, I want access to a database with UCSC course information
  - This is partially completed
- As a user, I want to be notified if a class I have scheduled requires prerequisites I have not fulfilled.

Work Completion Rate

We made great progress in our last sprint. We have completed almost all of our user stories and those that are not yet complete have someone working on them and have plenty of time to be completed.

Summary

We met frequently and brought some progress every meeting instead of just one or two of us having a good portion of their user stories complete. Many user stories finally left in progress and even testing. Most of our user stories were complete and we still have plenty of

time to work on the last few user stories before a user acceptance test. Some of us are now working to make the application more appealing while others are finishing up the last few pieces of required elements of our application.
